

AKSHAT

DevOps Engineer | CI/CD | AWS | Automation | Linux

+91 8894604005 | akshat26april@gmail.com | linkedin.in/akshat26akd | github.com/akshat26akd

SUMMARY

DevOps Engineer with 3+ years of experience in CI/CD, Jenkins, and AWS cloud infrastructure. Skilled in automating build and deployment pipelines, managing on-premise and cloud environments, and improving system reliability and performance through scalable, repeatable solutions. Proficient in Python and shell scripting, containerization, and infrastructure monitoring.

WORK EXPERIENCE

DevOps Engineer

July 2023 – Present

Aumovio India Pvt. Ltd. (Formerly Continental)

- Designed and maintained **CI/CD pipelines** using **Jenkins**, reducing deployment time by **35%** and improving release frequency.
- Managed and optimized on-premise **25+ Jenkins nodes**, improving build reliability and reducing failures.
- Automated infrastructure provisioning and configuration using **shell scripting** and **Python**, decreasing manual effort by **40%** and minimizing human errors.
- Deployed and managed applications on **AWS (EC2, S3, IAM)** as part of a **hybrid infrastructure setup**, improving system performance by **40%**.
- Collaborated with development teams to implement **DevOps best practices**, reducing incident resolution time by **25%** and enhancing system stability.

Application Development Intern

May 2022 – July 2022

CareX Pvt. Ltd.

- Developed a **working prototype** of the product for user as well as for the service provider.
- Developed the **frontend** of the app using **HTML5, CSS3 and React Native**.
- Created a **wireframe of the product** for the future development of the product.

Multimedia Intern

Nov 2019 – Mar 2020

CollegeGuru

- Restructured the UI of the app as well as of the website which increased user **retention by 70%**.
- Responsible for all the **multimedia related works** of this startup under H.P. Govt. Startup Scheme
- Eventually elevated to the **leadership role** of multimedia operations.

PROJECTS

Intelligent Infra Health Monitor | *Python, Flask, SQLite, Jenkins REST API, AI/LLM* Feb 2026 – Mar 2026

- Developed a centralized **Flask-based monitoring and automation dashboard** for on-prem **Jenkins infrastructure**, delivering real-time visibility into node health, build activity, and agent performance.
- Reduced manual monitoring and failure-triage effort by **50%**, significantly improving team productivity and incident response time.
- Infrastructure Monitoring:** Tracked disk, memory, and workspace usage, agent availability, executor utilization, and build-queue status with configurable warning/critical thresholds.
- AI-Powered Failure Analysis:** Integrated an **LLM assistant** that auto-detects build failures, performs root-cause analysis, classifies issues as infrastructure vs. code defects, and offers an interactive chatbot with **SSE streaming**.
- Build Intelligence:** Monitored nightly builds, failure streaks, and per-node build history, with automatic agent attribution for parallel test executions across distributed nodes.
- Automation & Alerting:** Added selectable **Teams/email notifications**, role-based auth, audit logging, and SQLite-backed caching with 7-day historical trend charts.

- Developed an automated **requirement analysis tool** using **Natural Language Processing (NLP)** techniques such as **Named Entity Recognition (NER)**.
- Streamlined requirement extraction workflow, reducing manual effort by **90%** and improving consistency across engineering documents.
- Designed modular and reusable pipelines for processing large volumes of unstructured data efficiently.

- Developed a responsive weather application using **React** and integrated with **OpenWeatherMap API** for real-time data retrieval.
- Implemented **geolocation-based services** and dynamic search functionality with robust error handling.
- Optimized API calls and frontend performance to ensure smooth user experience across devices.

EDUCATION

Jaypee University of Information Technology (CGPA 7.98/10) <i>Bachelor of Technology in Computer Science and Engineering</i>	Solan, HP (India) <i>July 2019 – May 2023</i>
St. Xavier’s Residential School (Percentage 84.2/100) <i>Non-Medical XII</i>	Kot, HP (India) <i>April 2017 – May 2019</i>
Govt. Sr. Sec. Model School (CGPA 9.8/10) <i>Science X</i>	Sundernagar, HP (India) <i>April 2016 – May 2017</i>

TECHNICAL SKILLS

Cloud & DevOps: AWS (EC2, S3, IAM), Jenkins, CI/CD Pipelines, Docker, Kubernetes, Automation
Operating Systems & Tools: Linux, Shell Scripting, Git, Monitoring & Logging
Programming & Scripting: Python, Bash, SQL
Web Development: ReactJS, HTML, CSS, JavaScript
Machine Learning: Machine Learning, NLP

CERTIFICATIONS

AWS Cloud Practitioner Essentials <i>Show Credentials</i>	Mar 2025
Machine Learning Specialization <i>Show Credentials</i>	Mar 2023
Advanced React <i>Show Credentials</i>	Mar 2023
Getting Started with Python <i>Show Credentials</i>	Feb 2023
HTML, CSS, and JavaScript <i>Show Credentials</i>	Feb 2023
